OAMPS Sports Insurance

The management of risk and insurance in the sports and leisure industry gets more complicated every year. New legislation and legal precedents have had a large impact on the ability of associations and sporting bodies to be able to develop a safe framework for their members.

More than ever, it is now vital that all Principles of organisations in the industry get expert advice to enable them to continue operating effectively by minimising exposure to litigation and financial costs. It is no longer enough to simply presume you have enough insurance cover or that there will not be a problem if something goes wrong. The penalties, to both the organisation and its Principles, of a mistake can be crippling.

Each sport or activity is different and carries with it different risks. Any insurance and risk management program must be designed for the inherent risks of each specific sport.
