

FURNEYS STOCKFEEDS- PRODUCT RECALL

19 NOVEMBER 2021

HRNSW has been advised by Furneys Stockfeeds that some commercially available feeds, in particular the following products, have been found to contain levels of cobalt above that specified on the labels.

Trainers are advised that the following products should not be fed to horses as doing so may result in those horses being presented to race with a cobalt level above the prescribed threshold.

Date	Product Name	Label Number
