

HARNESS RACING NSW CLEAR DAY RULE CHART

The charts below relate to Harness Rules which prohibit the administration of an injection or needle for a clear day (Rule 196B) and the shock wave treatment (Rule 213B).

These charts seek to assist the trainer by visually showing the days on which an injection cannot be administered.

The yellow highlights represent **clear days** on which the injection cannot be administered.

The green highlights represent the day of the **race**. Substances or treatments cannot be administered on the day of the race prior to that race.
